# WEBINAR

# 05 / 2021

 07 / 08 / 2021  11:00 – 13:00

**Mr. Mohd. Arshad Uddin,**  
(Mechanical Engineer)

**Topic: HTHA and Corrosion  
Mapping Solutions'**

## Abstract of the Topic

The objective of this presentation is to provide the current and the new NDT technology to detect **HTHA** (High temperature hydrogen attack) with newly launched probes, to help improve our understanding, capabilities with the use of Non-destructive testing technologies. So those costly failures can be prevented through good maintenance, and inspection practices, thus increasing safety, equipment reliability, and integrity.
